CONSTANT

Throughput of CS-1500 is almost not affected by samples detection

CONTINUOUS

Samples and reagent can be loaded and unloaded without interrupting ongoing instrument activities

CONSISTENT

Reagent can be used on either CS-1500 or CS-3000;
Can combine up to 4 instruments;
Easy to upgrade

CONVENIENT

STAT loading and easy maintenance

Throughput

120

Test/Hour

Principle

Acridinium Ester Labeled Direct Chemiluminescence

Reagents

- › 15 refrigerated reagent positions (2°-8°C)
- › Calibrator and control included

Samples

- › 24 Sample positions
- › With STAT function

Cuvettes

- › Up to 130 cuvettes capacity for continuous loading

Communications

- › Support Bi-directional LIS

Interface

- › USB Port, Network port

Language

- › English
